

ISTQB Foundation Level Extension Agile Tester Course
September 21 – September 22, 2016

Time is quickly approaching for your ISTQB Foundation Level Extension Agile Tester course September 21 – September 22, 2016! To help you prepare for the course and exam (if you purchased an exam voucher), we wanted to take this opportunity to provide some important information.

Recently you were given access to the e-learning version of this course. Your hardcopy PowerPoint slides are onsite. These are the materials that will be used throughout the course and are also a good resource for self-study prior to the exam. Please be sure to bring them to class each day. The instructor will not have any extra sets. We hope that you are taking advantage of these valuable self-study tools.

You also received access to another fantastic supplement to our course, a downloadable copy of the complete note set. This was released as part of our effort to “go green!” You can view the materials on and/or download the materials to a PC or mobile device. There is no expiration date on access to this valuable resource as they will be downloadable. Digital rights management and intellectual property rights are protected by some limitations such as the inability to share the file with others. Further, while the materials can be printed, each page includes a prominent watermark, with the exception of the pages in the ISTQB Syllabus and Glossary. The ISTQB Syllabus and Glossary are printable documents available to the public so they will not include the watermark.

As a reminder, although you will have printed slides, you should bring your mobile ShareFile documents to the live class via your device (preferably a hand held device for space purposes). The ShareFile documents contain information that will not be in the printed documents and will be convenient to have access to if needed. On each morning of the class please be sure that your device is fully charged and accessible!

Please download the exercise templates. These templates may be referred to during the course. You may want to print a copy of this file for use during the course. <http://www.stpcon.com/wp-content/uploads/2016/09/ISTQB-Found-EXT-Agile-Exercise-Handout.pdf>

Also, below is a link to an article that contains a mapping of test design techniques to risk levels which may also be referenced during the course. <http://www.rbc-us.com/documents/Managing-Test-Techniques-to-the-Extent-of-Testing.pdf>

Review information - Prior to the start of the course, please review the Agile syllabus <http://www.astqb.org/documents/ISTQB-Foundation-Agile-Syllabus.pdf> The syllabus is also provided in the downloadable course files (see above.)

Here are some logistics for the course:

Dates: September 21 – September 22, 2016

Times: Wednesday 10 am – 5:30 pm and Thursday 8:30 am – 5:00 pm

Instructor: Rex Black

Exam: *This week, if you ordered an exam, you will be sent an exam voucher code to use at a Kryterion Testing Center, along with instructions on how to use it. In the meantime, visit <http://www.kryteriononline.com/Locate-Test-Center> to locate a convenient exam center and to see more information. Please note that you cannot register for the exam until you have the voucher code.*

Congratulations on taking the plunge to become a certified tester! It is our pleasure to host your ISTQB Certification training course.
