# The Rainforest 3.0 QA Platform

Rainforest is a QA solution built for a world that runs on software.

Our solution empowers teams to take a strategic approach to quality and to automate their QA process, without slowing down deployment.

By combining expert QA strategy resources, crowdsourced execution and AI-based test validation, Rainforest gives your team everything you need to bring your QA process up to speed with your business goals and development needs.

## The Rainforest Difference

### Fast, Highly Reproducible Results

Rainforest provides test results in 30 minutes with everything you need to reproduce issues, from video recordings to browser logs.

### End-to-End Visibility into Quality

Gain visibility into the overall health of your application with reports to track key quality metrics and QA performance.

### Commitment to Your QA Success

We're more than just an execution platform. Rainforest offers access to QA experts to help you assess and refine your QA strategy.

## Solutions for Web and Mobile App Testing

Rainforest supports the browsers and devices that are most critical to your users. Run tests across multiple OS and device environments —in parallel — as frequently as you need.

## Integrations

QA doesn't happen in a vacuum. Rainforest integrates with the tools your QA and development team uses every day.

“Rainforest has become our functional QA department.”

- Max Spankie  
Developer for Consumer Affairs

## About Rainforest QA

Rainforest is changing the way QA is done in an era of continuous delivery. Our on-demand QA solution improves the customer experience by enabling development teams to discover significantly more problems before code hits production. Hundreds of companies including Adobe, Oracle and Solarwinds use Rainforest to automate their QA testing process and easily integrate it with their development workflow via a simple API. Headquartered in San Francisco, Rainforest is a 2012 Y Combinator graduate funded by Bessemer Venture Partners and SVB Capital among others. For more information, visit <https://www.rainforestqa.com>.
